

Results of the Matrix - Skills Match

As seen from all the matching procedure, learners need to know the language of the host country under the title of "language", while trainers have this skill. The main reason for this need is that the learner encounters or thinks that s/he will encounter disadvantages arising from not knowing the language of the host country in participation in education, social and economic life.

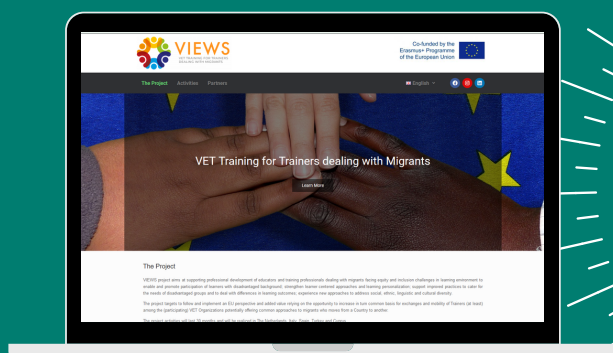

When examine the needs of learners in soft skills in general, it is necessary for learners to be understanding, empathetic, caring, patient, supporting and motivating individuals in order to be able to actively participate in the learning processes and feel themselves in the field. In this regard, in addition to professional skills, it is seen that learners need trainers with "soft skills".

As a result of the matching table, it is seen that the trainers have soft skills.

Immigrants aim to both improve themselves and participate in economic and social life in the field they receive education. Therefore, it needs skills that are useful in professional and personal life. Therefore, it needs the support of trainers in acquiring and using skills such as creativity, critical thinking, teamwork, decision making, communication

HINT !

Qualified education is possible by knowing the needs of learners, meeting and supporting these needs by expert trainers. Supporting and developing the skills and equipment of trainers through training of trainers allows the society to raise individuals who are better equipped in personal and professional fields.

The Partnership

Training courses curriculum design

VIEWS consortium is focusing on creating 6 training modules which includes the following:

- Module 1 - Culture and Diversity
- Module 2 - Rights, Duties and Citizenship
- Module 3 - Languages
- Module 4 - Digital Experiences
- Module 5 - Soft Skills
- Module 6 - Empowering and Coaching

The e-Learning environment will be integrated with other social learning platforms to increase flexible learning pathways of VET trainers&teachers in the field of migrant inclusion.

Web database creation

VIEWS OER Repository will be organized in thematic areas relevant for the trainers' needs and fit with the Matrix results.

Will offer a European overview of the available resources that is why it will include resources in English and in the languages of the partner Countries.
